Checklist for the acceptance of a Dog/Cat in the Passenger Cabin

I acknowledge that

- Brussels Airlines has duly informed me of the risks of air travel for my dog and/or cat.
 My animal is clean and fit for travel
- My animal is at least 12 weeks old (to/ from Germany: 15 weeks), proving documentation is available
 My animal is kept in a soft sided transport bag during the entire flight in the foot space in front of my seat

Acceptance of snub-nosed breeds:

- I understand that brachycephalic animals suffer from a significant risk of mortality during transportation on board of an aircraft due to respiratory distress, injury or sickness as a consequence of their breathing difficulty. Therefore, as owner of the animal, I fully discharge Brussels Airlines, its agents, subcontractors and insurers if the animal suffers from this condition during the carriage and/or leads to injury or mortality during transportation and expressly renounce to any claim except if demonstrated that the injury or mortality has another origin for which Brussels Airlines could be liable.

My soft sided transport bag is

- max. 118 cm (55 x 40x 23 cm) and weighs up to max. 8kg incl. animal
 suitable for the animal's size. My cat/dog can sit, stand, turn and lie down in a natural position
- appropriately ventilated from all 4 sides
 leak and escape proof

Checklist for the Acceptance of an Assistance or Search/Rescue Dog

My dog will

- fit in the foot space in front of my seat
 lie or sit on the floor in front of my seat, secured with a leash
- not sit on a passenger seat under any circumstances
 preferably be secured with a harness rather than a collar

I confirm to have read and understood following transport conditions:

- It is my responsibility to ensure that all import, transfer and export regulations for the animal and the animal welfare provisions are met for the entire trip. I am holding all necessary documents (e.g. pet passport, vaccination certificate etc.).
 My animal is trained to be obedient and behaves properly in public settings (i.e. no barking, growling).

- Should my animal not meet the conditions listed above, the airline may confine the animal to the baggage compartment against a charge or even deny carriage. Snub-nosed breeds are exempted from transport in the hold. I will be held liable for any resulting costs e.g. rebooking fees, hotel accommodation, animal shelter.
